MedRazor

HAIR REMOVAL

MedRazor offers the safest and most effective laser hair removal method with diode laser technology which is regarded as the golden standard of painless permanent hair reduction treatment.

- TGA registered medical grade equipment
- Clinically documented and proven results
- Low maintenance cost and reliable handpiece
- Sliding technology means quick, painless and safe
- Pre-set treatment parameters make your work easier
- Easily treat on all skin type and various hair colour (including blonde and grey)

OVERVIEW

- MedRazor Diode Laser Therapy System holds a wavelength of 808nm which can accurately target the hair follicle. Meanwhile, hair follicle stem cells will be damaged and hair growth will be inhibited. According to the principle of selective photothermolysis, the lasers damage the chromophores by selectively heating them while leaving surrounding tissue unharmed.
- UniChill™ patented 3 in 1 cooling technology guarantee patients' safety and comfort.

Perfect combination of water refrigeration and semi-conductor refrigeration with long endurance.

Hair Removal

Hair removal is always people's huge demand for both male and female.
