

SAMedSHAPE

SAMedSHAPE

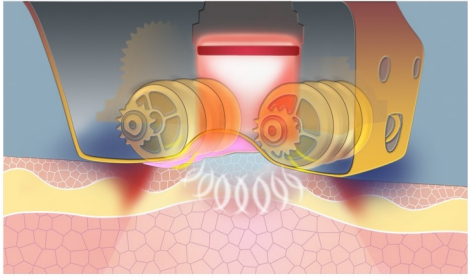

BODY CONTOURING. SKIN TIGHTENING

SAMedShape is the technology to improve the appearance of cellulite while smoothing and reshaping the body. It uses **Infrared** and **Radio Frequency** to precisely target and heat fatty tissues in specific areas of the body while suction and massage rollers smooth and contour the skin. It's safe, effective with worldwide proved clinical efficacy.

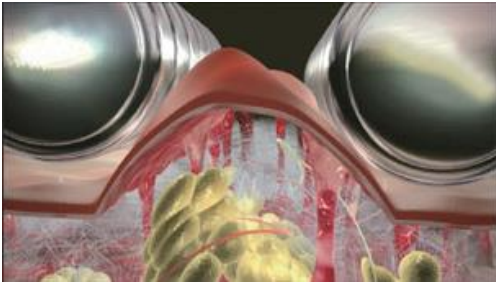

- 10M HZ bipolar radio frequency (RF)
- 700-2000 nm infrared light heats the connective tissue to accelerate regeneration of collagen and elastin fibres
- 0-0.07 M Pa adjustable vacuum suction
- Automatic massage roller

OVERVIEW

- All parameters can be adjusted either on touch screen or control panel of hand pieces.
- Two different hand pieces to target different areas
- Two operation modes for cellulite and body contouring.
- Infrared light (IR) heats the tissue up to 3 mm depth.
- Bi polar radio frequency (RF) heats tissue up to ~15 mm depth.
- Vacuum +/- massage mechanisms enable precise targeting of energy to the tissue.

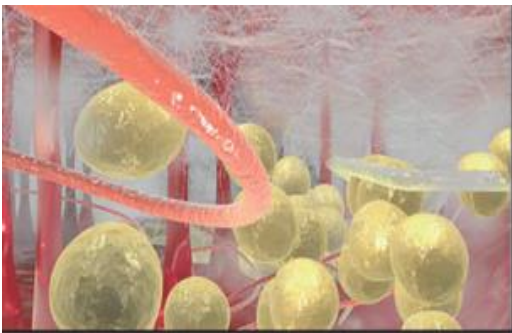

Before the treatment

Infrared light heats the tissue to 5 mm

RF heats the tissue from 2 to 20 mm in the depth

After the treatment
